BUFFALO BICYCLES

BUILT FOR BIG LOADS ON TOUGH ROADS IN AFRICA

Frame, Fork and Carrier

- Tested to be 10x stronger than the strongest traditional bikes
- Heavy-gauge, TIG-welded frame
- Tubular steel carrier rated for 100kg
- Tested by leading U.S. frame lab
- Universal frame fits and appeals to all riders
- Highly compatible with common spare parts

Wheels and Tires

- Puncture-resistant casing, long-wear tires
- Heavy-duty steel rims
- Standard and balloon tires
- Stainless steel spokes and spoke nipples for high tension wheels
- Heavy duty, rubber tubes with easy pumping valves

Sport-Utility MTB frame provides universal fit

Drivetrain

- Rugged single-speed drivetrain
- Heavy-duty cranks and chains
- Coaster brake internal hub tested in Germany: Robust, serviceable and more dependable than rod brakes
- Caged-bearing bottom bracket with heat-treated, hardened spindle

Cockpit, Hardware and Accessories

- Pedals with forged axles and improved bearing design
- High-comfort, durable seat
- Extended seatpost and stem for greater adjustability
- Steel fenders and heavy-duty chain guard
- Locking, spring-loaded center stand
- Superior reflectors for increased safety
